

**LAB University of
Applied Sciences**

LAB Winter School 2023

Climate Change and Circular Economy

12.-17.2.2023
Lahti, Finland

LAB Winter School 2023

Are you interested in environmental and sustainable issues?

- LAB Winter School course
CLIMATE CHANGE AND CIRCULAR ECONOMY
- Aimed for students interested in environmental issues with either a technological or a business/marketing background, who are particularly interested in how to combine new thinking and concepts with urban sustainability.
- The topic to the teamwork comes from the local companies who are very keen to get new ideas from young people around Europe.

NATURE

Unforgettable experiences

LAB Winter School 2023

- **FINNISH WINTER**

Nature activities and the social programme offer the opportunity to experience Finnish winter and culture with activities, such as **sauna bathing, ice swimming and ice fishing.**

- **INTERNATIONAL EXPERIENCE**

We will have about 50 students participating from 8–10 different countries.

- **LEARNING METHODS**

Lectures, excursions, company visits, teamwork in interdisciplinary and international teams, project work supervised by teachers, and by work-life partners.
