Applied Sciences**

# LAB Winter school 2021

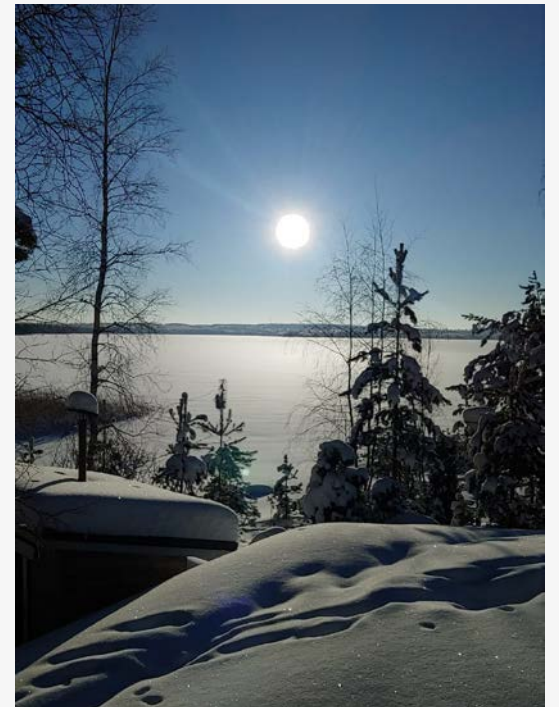

# LAB online Winter School 2021

- Do you want to experience international learning on-line?
- LAB Winter school course **CIRCULAR ECONOMY AND RESOURCE EFFICIENCY** will be organized first time online. We'll keep the good elements of being multidisciplinary and international even online.
- **15 – 19 February 2021**
- Aimed for students interested in environmental issues with either a technological or a business background, who are particularly interested in how to combine new thinking and concepts with the urban sustainability.
- The topic to the teamwork comes from the local companies who are very keen to get new ideas from young people around the Europe.

# LAB online Winter School 2021

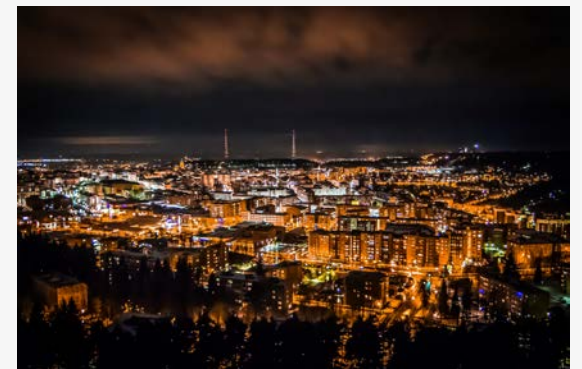

- Completing the whole programme, preparatory work + active participation + final presentation gives 5 ECTS.
- **LEARNING METHODS**  
Online lectures, teamwork in interdisciplinary and international teams, project work supervised by teachers, and by work-life partners online.
- **ASSESSMENT METHODS AND CRITERIA**  
Preliminary work in national teams, online attendance requirement, active participation in lectures, workshops, project assignments, and presenting results.
